

Flying Graphics

This title offers a dedicated mailing and e-mail campaign to targeted graphic design related media. Featuring more than 500 full-color designs, this stunningly illustrated volume brings together twenty of the most creative and original graphic artists to keenly explain what designing flyers means to them on a personal, professional, and artistic basis. Each of the featured artists has used the flyer as a means of escape from the conventional and less-suggestive mediums that large publicity agencies and design studios tend to rely on. The flyer sets them free, helping to create attractive and alternative compositions without limits or censure. See the results for yourself!
